

MEDICAL COAT PLUS INVENTORY SYSTEM USER MANUAL

Initial Setup Guide

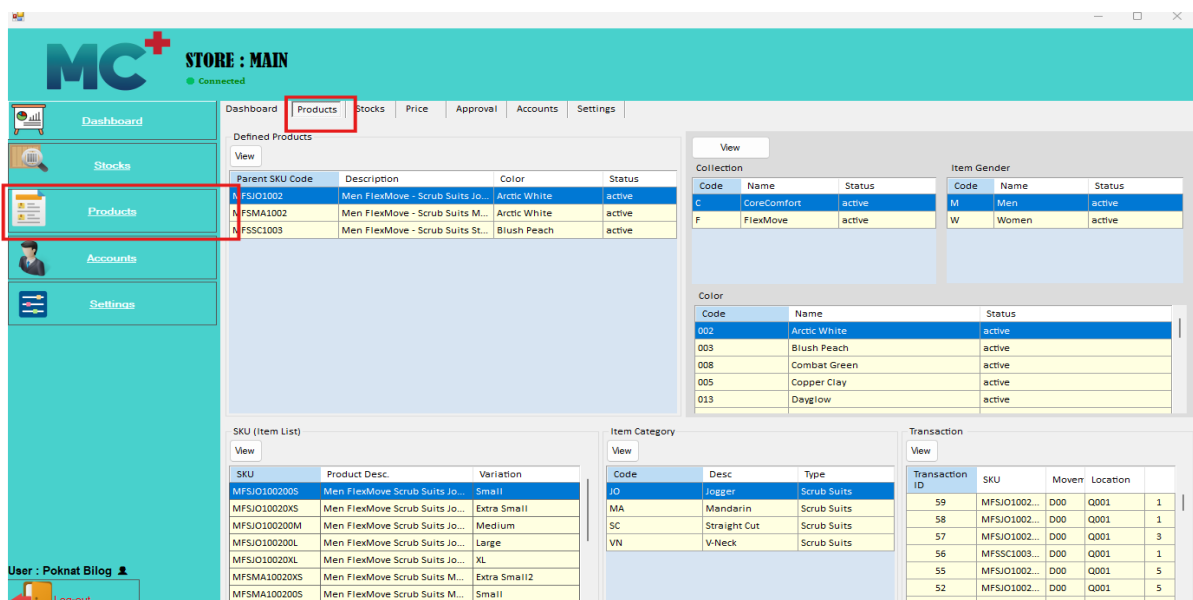

After installing the Inventory System, the Admin must first configure the **database connection**.

Once connected:

1. Log in using the **Admin account**.
2. Go to **Settings**.
3. Set up the **Store**.
4. Click **Save** to apply changes then logout.

The system is now ready to use.

The Product Tab allows users to manage and view product-related data within the system. This module provides access to product items, collections, gender classifications, colors, categories, SKUs, and transaction history. It also supports the creation and updating of product definitions and related records.

A. Prerequisites Before Creating a Product

Before creating a product, the user must ensure that all required product reference data is properly defined and complete. Accurate setup of these details is necessary to ensure correct product classification and variant generation within the system.

The user must clearly define the following product information:

- **Gender** – Specifies the target gender classification of the product (e.g., Male, Female, Unisex).
- **Collection** – Refers to the fabric or product collection grouping to which the item belongs.
- **Color** – Defines the available or assigned color of the product.
- **Product Type** – Indicates the general category of the product (e.g., Scrub Suits, Caps, Medical Coats).
- **Style Category** – Defines the style classification under a product type (e.g., Mandarin, V-Neck, etc.).
- **Style Variant** – Specifies the variation under a style category (e.g., Scrub Suit Mandarin may include variants such as with zipper or buttons).
- **Variation**– Defines the product variations such as size, or other distinguishing characteristics that differentiate each SKU.

All the above prerequisites must be properly configured before proceeding with product creation and variant setup.

Managing Gender, Collection, and Color

To access these modules:

1. Navigate to the **Product Tab**.

2. Click the **View** button. See the picture below

Creating a Gender

To create a new Gender entry:

1. Go to the **Product Tab**.
2. Click **Gender, Collection & Color**.
3. Under the **Gender** section, click the **Add** button.
4. Enter the required details:
 - **Code**
 - **Description**
 - **Status**
5. Click **Add** to save the new Gender.

Creating a Collection

To create a new Collection:

1. Navigate to the **Product Tab**.
2. Click **Gender, Collection & Color**.
3. Under the **Collection** section, click the **Add** button.
4. Enter the required details:
 - **Code**
 - **Description**
 - **Status**
5. Click **Add** to save the new Collection.

Creating a Color

To create a new Color:

1. Go to the **Product Tab**.
2. Click **Gender, Collection & Color**.
3. Under the **Color** section, click the **Add** button.
4. Enter the required details:
 - **Code**
 - **Description**
 - **Status**
5. Click **Add** to save the new Color.

Note: The **Code** field is non-editable; only the **Description** and **Status** of Gender, Collection, and Color can be modified after creation.

Managing Product Type, Style Category, and Style Variant

The **Product Type**, **Style Category**, and **Style Variant** are hierarchical components used to define product structure within the system. These must be configured in sequence before creating products.

Structure Overview

- **Product Type** – Represents the main category of the product (e.g., Scrub Suits, Caps, Medical Coats).
- **Style Category** – Defines the style classification under a Product Type (e.g., Mandarin, V-Neck).
- **Style Variant** – Specifies the variation under a Style Category (e.g., with zipper, with buttons).

Note:

The **Wear Type** is associated with the **Style Category**. It is used for classification purposes only and is **not included in the SKU code generation**.

To access the module, Navigate to the **Product Tab** > Click button **View** under *Item Category*.

The screenshot displays the 'Item Module' interface with the 'Style Category' tab selected. The interface is divided into three main sections: Product Type, Style Category, and Style Variant.

Product Type Section:

Code	Description
S	Scrub Suits

An 'ADD' button is located to the right of the table. The 'Wear Type' label is circled in red.

Style Category Section:

Code	Description	Wear Type	Type
JO	Jogger	Pants	Scrub Suits
MA	Mandarin	Tops	Scrub Suits
SC	Straight Cut	Pants	Scrub Suits
VN	V-Neck	Tops	Scrub Suits

An 'ADD' button is located to the right of the table. The 'Wear Type' column is highlighted in blue.

Style Variant Section:

Style Category: [Text Field]
Code: [Text Field]

Code	Description
------	-------------

An 'ADD' button is located to the right of the table.

Transaction Section:

Transaction ID	SKU	Move	Location
65	MFSJO1002...	D11	Q001
64	MFSJO1002...	D11	Q001
63	MFSJO1002...	D11	Q001

Red arrows indicate the flow from the 'View' button in the 'Item Category' section to the 'Style Category' section, and from the 'ADD' button in the 'Style Category' section to the 'Style Variant' section.

Creating a Product Type

To create a Product Type:

1. Click the **Add** button.
2. Enter the required details:
 - **Code**
 - **Description**
3. Click **Add** or **Submit** to save the record.

Creating a Style Category

To create a Style Category:

1. Click the **Add** button.
2. Enter the required details:
 - **Code**
 - **Description**
 - **Wear Type** - Select from the dropdown list. If the required Wear Type is not available, it must be created first before proceeding.
 - **Product Type** - select from the dropdown list
3. Click **Add** or **Submit** to save the record.

Creating a Style Variant

To create a Style Variant:

1. Click the **Add** button.
2. Enter the required details:
 - **Code**
 - **Description**
 - **Style Category** (select from the dropdown list)
3. Click **Add** or **Submit** to save the record.

B. Defining a Product and Generating SKU

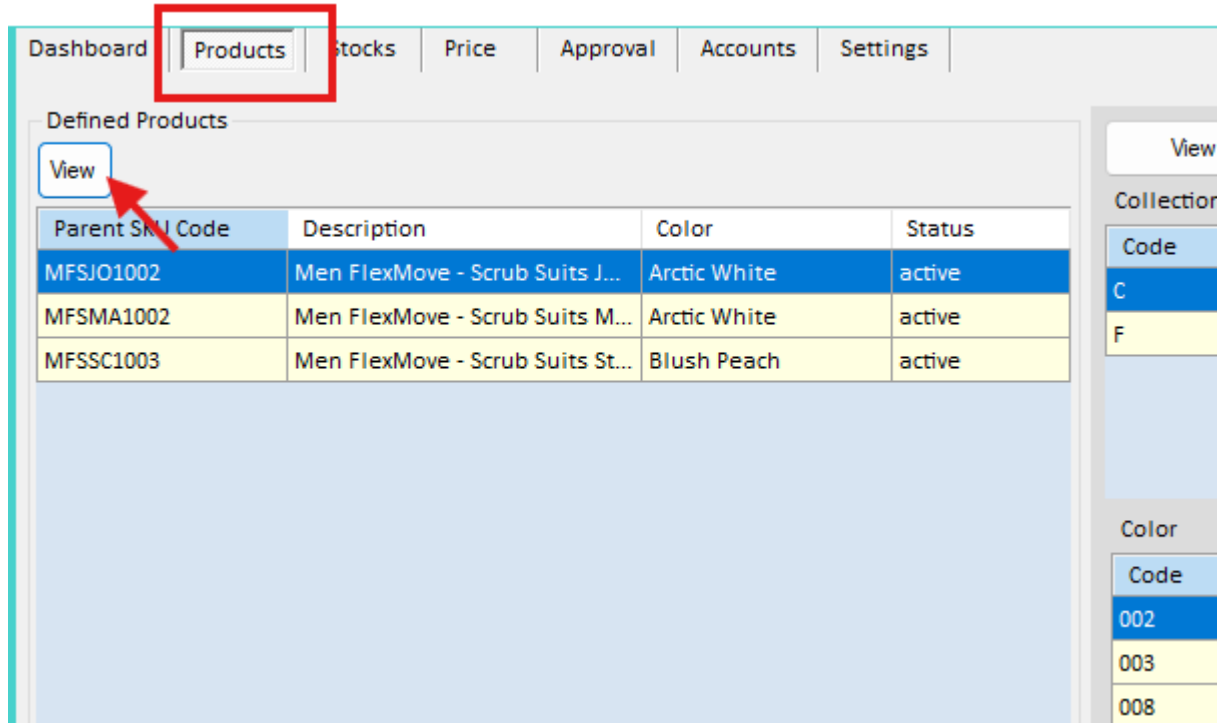

The **Define Product** module is used to create product records and generate unique SKUs (Stock Keeping Units) for each item. Before proceeding, ensure that all required prerequisites (e.g., Gender, Collection, Color, Product Type, Style Category, and Style Variant) have been properly configured.

Once all necessary data is defined, the user may proceed with creating the **Parent SKU** and its corresponding item variants.

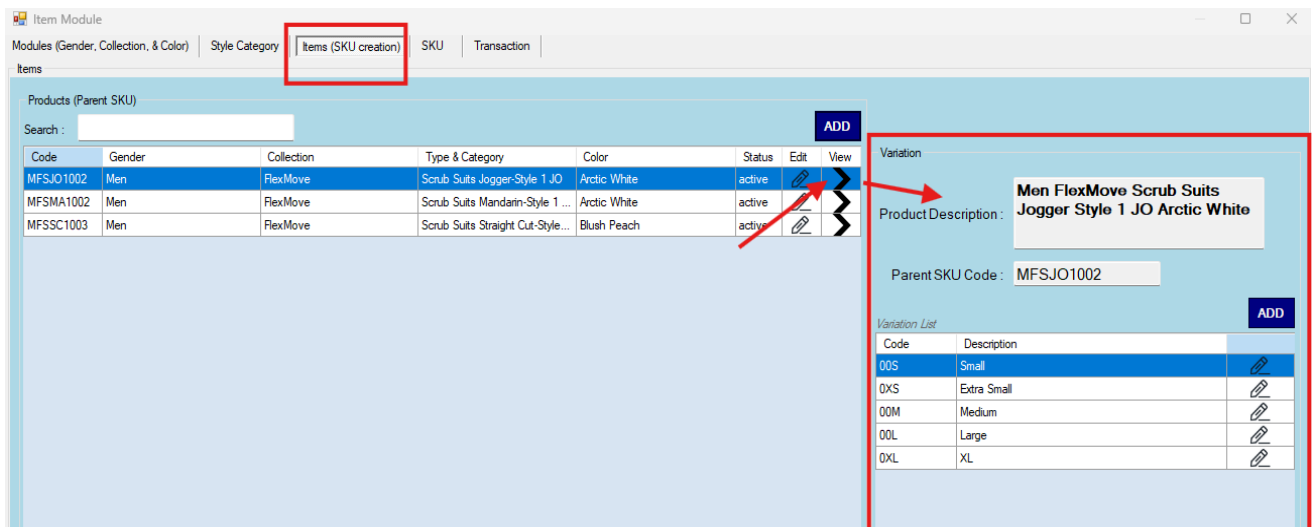

Accessing the Defined Products Module

To access the product definition screen:

1. Navigate to the **Product Tab**.
2. Under **Defined Products**, click **View**.

3. The system will display the list of existing **Parent SKUs**.
4. To view item variations, click the **View** button on a selected Parent SKU record.

Creating a Parent SKU

A **Parent SKU** must be created first before generating item-level SKUs (variants).

To create a Parent SKU:

1. In the **Defined Products** module, click the **Add** button under **Parent SKU**.
2. Complete the required fields (all fields are selected via dropdown lists):

- **Gender**
- **Collection**
- **Color**
- **Product Type**
- **Style Category**
- **Style Variant**
- **Status**

3. Set the **Status** to **Active** during creation.

The screenshot shows a web form titled 'frmParentSKU'. It contains several dropdown menus for selection: 'Select Gender' (Men), 'Select Collection' (CoreComfort), 'Select Color' (Blush Peach), 'Select Product Type' (Scrub Suits), 'Select Style Category' (Mandarin), and 'Select Style Variant' (Style 1 MA). Each dropdown has a small letter or number to its right (M, C, 003, S, MA, 1). Below these is a 'Status' field with a button labeled 'active'. At the bottom, there is a 'Parent SKU Generated Code' field displaying 'MCSMA1003'. At the very bottom right are 'Add' and 'Cancel' buttons.

Note : Field Behavior and System Logic

- Selecting a **Product Type** will automatically filter the available options in the **Style Category** dropdown.
- Selecting a **Style Category** will automatically filter the available options in the **Style Variant** dropdown.
- The **Parent SKU Code** is automatically generated by the system and is **non-editable**.

MFSSC1003	Men	FlexMove	Scrub Suits Straight Cut-Style...	Blush Peach	active		
MCSMA1003	Men	CoreComfort	Scrub Suits Mandarin-Style 1 ...	Blush Peach	active		

4. After completing all required fields, click **Add** to save the Parent SKU.

Creating Item Variants (SKU per Item)

After successfully creating a **Parent SKU**, users may proceed to define the specific item variations (e.g., size-based SKUs).

Accessing Variations

1. Navigate to the **Defined Products** module under the **Product Tab** then click **View**.
2. Locate the desired **Parent SKU**.
3. Click the button on the same row to display its existing variation list (if any).

ADD

Code	Gender	Collection	Type & Category	Color	Status	Edit	View
MFSJO1002	Men	FlexMove	Scrub Suits Jogger-Style 1 JO	Arctic White	active		
MFSMA1002	Men	FlexMove	Scrub Suits Mandarin-Style 1 ...	Arctic White	active		
MFSSC1003	Men	FlexMove	Scrub Suits Straight Cut-Style...	Blush Peach	active		
MCSMA1003	Men	CoreComfort	Scrub Suits Mandarin-Style 1 ...	Blush Peach	active		

Variation

Product Description : **Men CoreComfort Scrub Suits Mandarin Style 1 MA Blush Peach**

Parent SKU Code : MCSMA1003

Variation List

Code	Description
------	-------------

Adding a New Variation

To create a new item variation:

1. In the **Variation List**, click the **Add**.
2. Enter the **Variation Description** (e.g., Small, Medium, Large).

The screenshot shows a web interface for managing variations. The main area has a 'Variation' section with a 'Product Description' field containing 'Men CoreComfort Scrub Suits Mandarin Style 1 MA Blush Peach' and a 'Parent SKU Code' field containing 'MCSMA1003'. Below this is a 'Variation List' table with columns 'Code' and 'Description'. A blue 'ADD' button is located to the right of the table. A modal dialog titled 'frmProductVariant' is open in the foreground, mirroring the product description and parent SKU code. It has additional fields for 'Variant' (containing 'Small') and 'Variant Code' (containing '00S'). At the bottom of the modal are 'Add' and 'Cancel' buttons. A red arrow points from the 'ADD' button in the background to the modal dialog.

3. Click **Add** to save the new variation.

This screenshot shows the same 'Variation List' interface as the previous one, but now the 'Variation List' table contains one row: '00S' under the 'Code' column and 'Small' under the 'Description' column. A red rectangle highlights the entire table area. The 'ADD' button is still visible to the right of the table.

Once variations are created, the system will generate the corresponding item-level SKUs based on the defined Parent SKU and variation attributes.

Data Processing and Visibility

After defining a product item or SKU, the data will not be immediately visible in other modules.

Please note the following:

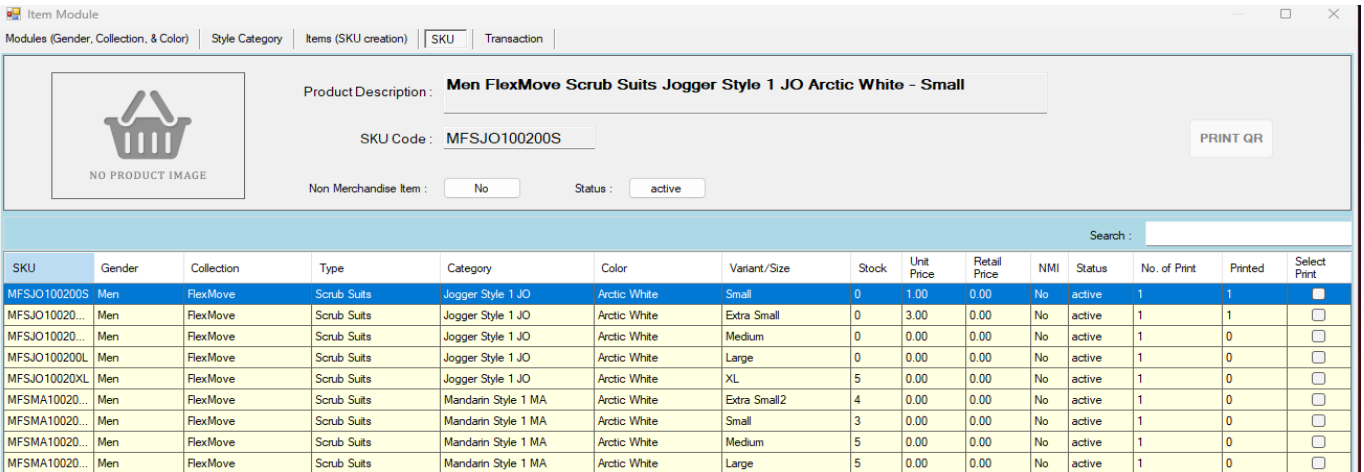

- Newly created products or SKUs are processed by the system and will automatically become visible in the **SKU List**, **Item Price**, and **Item Balance** modules after the daily system data update at **12:00 midnight**.
- If immediate visibility is required, the user may request assistance from the **IT Administrator** to manually trigger the process (*For IT : Go to settings for manual trigger*).

Viewing the Item/SKU List

Users can view a quick list of all items and their corresponding SKUs, along with key details such as price and stock levels.

To access the Item/SKU list:

1. Go to the **Product** tab.
2. Click the **SKU (Item List) View** button.
3. The system will display the list of all items and SKUs, including their basic details such as:
 - Item Name / SKU
 - Price
 - Stock Balance
 - Other relevant information

The screenshot shows the 'Item Module' window with the 'SKU' tab selected. The product description is 'Men FlexMove Scrub Suits Jogger Style 1 JO Arctic White - Small'. The SKU code is 'MFSJO100200S'. The 'Non Merchandise Item' is 'No' and the 'Status' is 'active'. A 'PRINT QR' button is visible. Below this is a table with columns: SKU, Gender, Collection, Type, Category, Color, Variant/Size, Stock, Unit Price, Retail Price, NMI, Status, No. of Print, Printed, and Select Print. The table contains 10 rows of data.

SKU	Gender	Collection	Type	Category	Color	Variant/Size	Stock	Unit Price	Retail Price	NMI	Status	No. of Print	Printed	Select Print

This section gives users a quick overview of all products without needing to open each item individually.

II. Stocks Tab

The **Stocks** tab allows users to monitor and manage inventory across the system. *Go to Stocks Tab*

Within this tab, users can perform the following:

- **View Actual Stocks** – Check the current stock levels of items.
- **View Stocks per Location** – See stock distribution across different locations.
- **Manage Suppliers** – Access and review the list of suppliers.
- **Transfer Stocks** – Process stock transfers between warehouses (stock in and stock out).
- **Receive Purchase Orders (PO)** – Receiving items from approved purchase orders delivery.
- **Manual Receiving** – Enter and record stock received without a system-generated purchase order.

This tab serves as the central module for tracking inventory movement and ensuring accurate stock levels across all locations.

View Stocks and Locations

Allows users to monitor item stock and identify the specific location where each item is stored.

In the **Stocks Tab**, users can view the total stock of each item. By double-clicking a specific item row, the system will display a detailed breakdown of stock per location.

The screenshot displays the MC+ STORE: MAIN interface. The 'Stocks' tab is active, showing a table of items. A red box highlights a specific item row: 'Men FlexMove Scrub Suits Jogger Style 1 JO' in Arctic White, Large variation, with a stock of 5. A red arrow points from this row to a pop-up window titled 'Item Location/s'. This pop-up window shows a detailed breakdown of stock by location: S001 (5) and Q001 (0). The pop-up also displays item details: 'Men FlexMove Scrub Suits Jogger Style 1 JO', 'Arctic White', and 'Large'. The background shows a sidebar with navigation options like Dashboard, Stocks, Products, Accounts, and Settings. A 'Supplier List' is also visible on the right.

A. View and Manage Supplier List

Allows users to view, create, and update supplier information in the system. Users can also access the supplier list to see all registered suppliers and their details.

The system also allows the following actions:

- **View Supplier List** – Display all existing suppliers and their information.
- **Create Supplier** – Click and Add a new supplier by entering the required details.

- **Update Supplier Details** – To modify a supplier, click this  button in the same row of the selected supplier.

B. Outgoing Transfer (Stock OUT)

Outgoing transfers refer to stock movements from one store or warehouse to another. This process follows a status-based workflow to ensure proper approval, picking, delivery, and receiving.

Create Transfer

To create a stock transfer, follow these steps:

1. Click the **Outgoing Transfer/s** button.
2. Navigate to **Transfer Creation**.

3. This screen allows you to create a list of items that need to be transferred.

Stock-OUT Movement

Transfer Creation | Reroute | For Approval | To Pick | Ready To Ship | In Transit | Partially Received | Received | Cancelled

- **Reroute (10)**

The transfer can be moved to **Reroute** status if modifications are needed at any stage (from *For Approval* up to *Ready to Ship*).

This is used when there are changes such as incorrect items or quantity adjustments.

Once rerouted, the transfer will be reprocessed and returned to For Approval status for review and approval.

How to Modify Transfer (Reroute)

Transfer To

Destination : **Medical Coat Plus Ecom** Status : **Reroute**
ECOM

DR : 20260008 Date Created : April 23, 2026

REMARKS : Test remarks

Submit

	SKU	Item	Color	Variation	Location	Qty	
1	MFSJO100200L	Men FlexMove Scrub Suits Jogger Style 1 JO	Arctic White	Large	S001	3	X
2	MFSJO10020XL	Men FlexMove Scrub Suits Jogger Style 1 JO	Arctic White	XL	Q001	3	X

When a transfer is in **Reroute** status, users can update the item list or quantities as needed.

To modify the transfer:

Update Quantity

- Locate the item in the list.
- Change the quantity directly in the input field within the same row.

Delete an Item

- Find the item you want to remove.
- Click the button in the same row to remove it from the list.

Add a New Item

- Click button.
- Select an item from the list.
- A pop-up will display available locations.
- Choose the desired location to add the item to the transfer list.

Once all changes are completed, review the updated list.

Click the **Submit** button to **resubmit the transfer for approval**.

- **For Approval (0)**

After creating a transfer request with an item list, it will appear under this status. Only **RPT and ADM Users** are allowed to approve the transfer.

This action can also the delivery receipt

- **In Transit (3)**
Once the transfer is ready, the Delivery Receipt (DR) is printed. After printing, the transfer is moved to **In Transit** status.
- **Cancelled (9)**
The transfer will be marked as Cancelled if it is not approved or if it is rejected during the approval process.

Receiving Statuses

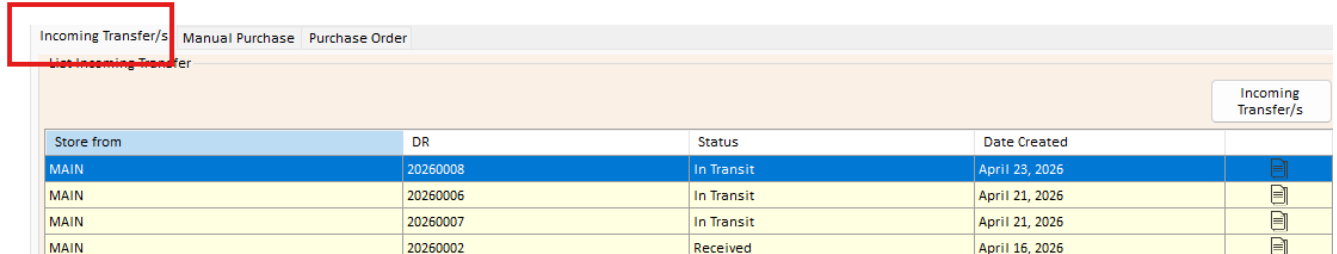

The following statuses can be viewed during the receiving process:

- **In Transit (3)** – Items are currently being delivered.
- **Partial Receive (3)** – Only part of the items has been received. *The status is still No. 3 if it was received but not complete.*
- **Received (4)** – All items have been successfully received.

Note: Only the receiving user is allowed to trigger status changes during the receiving process.

C. Receiving Incoming Transfers (Stock IN)

This section displays all incoming transfer Delivery Receipts (DR), with all statuses listed for easy viewing and processing.

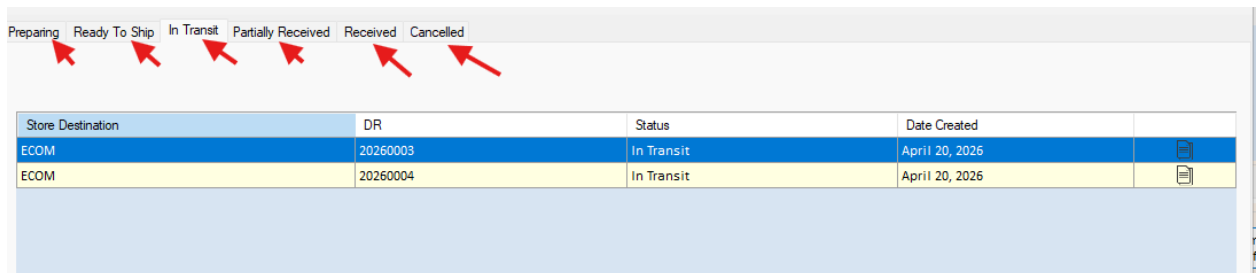

Incoming Transfer/s				
List Incoming Transfer				
Store from	DR	Status	Date Created	
MAIN	20260008	In Transit	April 23, 2026	
MAIN	20260006	In Transit	April 21, 2026	
MAIN	20260007	In Transit	April 21, 2026	
MAIN	20260002	Received	April 16, 2026	

To access incoming transfers:

1. Click the **Incoming Transfer/s** button.
2. A new window will appear displaying all incoming transfer records and their statuses.

Incoming Transfer Statuses

Users can view transfers under the following statuses:

Preparing Ready To Ship In Transit Partially Received Received Cancelled				
Store Destination	DR	Status	Date Created	
ECOM	20260003	In Transit	April 20, 2026	
ECOM	20260004	In Transit	April 20, 2026	

- **Preparing** – Items are still being prepared by the sending store.
- **Ready to Ship** – Items are ready for dispatch.
- **In Transit** – Items are currently being delivered.
- **Partial Receive** – Some items have been received, but not yet complete.
- **Received** – All items have been successfully received.
- **Cancelled** – The transfer has been cancelled.

How to Receive Items

To receive items from an incoming transfer:

1. Go to the **In Transit** tab.

2. Select the Delivery Receipt (DR) you want to receive.

Store Destination	DR	Status	Date Created	
ECOM	20260008	In Transit	April 23, 2026	
ECOM	20260006	In Transit	April 21, 2026	
ECOM	20260007	In Transit	April 21, 2026	

3. Input the received quantity for each item in the same row.

4. Click the **Receive** button to confirm.

SKU	Product Desc.	Color	Variation	Delivery Qty	Qty Received
1	MFSJO100200L	Men FlexMove Scrub Suits Jogger Style 1 ...	Arctic White	Large	3
2	MFSJO10020XL	Men FlexMove Scrub Suits Jogger Style 1 ...	Arctic White	XL	3

Partial Receiving and Complete Receiving

- If the received items are incomplete, the transfer will move to **Partial Receive** status. In this status, users can continue receiving the remaining items once they arrive.
- Once all items are fully received, the transfer status will automatically update to **Received**.

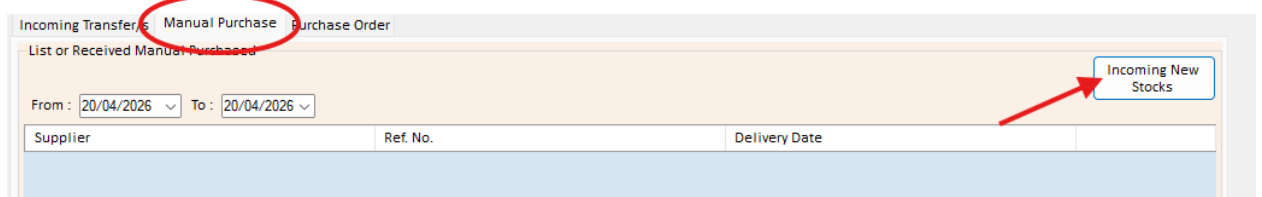

D. Manual Purchase (Stock IN)

In **Manual Purchase**, users can receive items that are purchased without a Purchase Order (PO) and record them as stock in the system.

How to Receive via Manual Purchase

To receive items using the **Manual Purchase** feature, follow these steps:

1. Click the **Incoming New Stocks** button.

2. Fill in the required details:

- **Supplier** (Add a supplier first if it does not exist)
- **Reference Number**
- **Receipt Date**
- **Delivery Date**
- **Remarks**

3. Click  button to display the list of available items.

Note: If the item is not yet in the system, you must create the corresponding product/SKU first before proceeding.

4. From the item list, double-click the desired item.

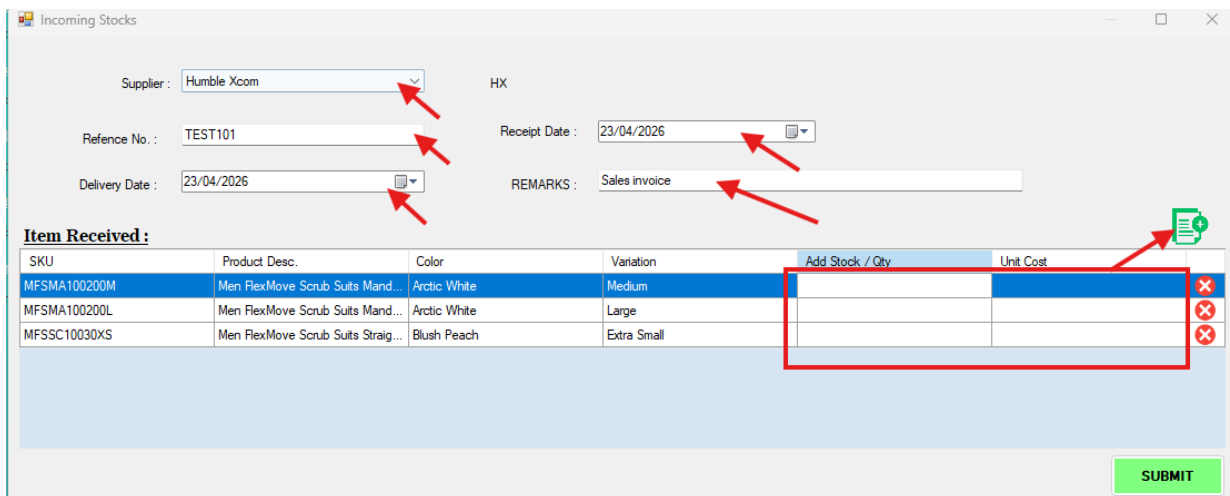

- The selected item will automatically be added to the stock-in list.

5. Enter the following details in the same row:

- **Quantity**
- **Unit Cost**

6. To remove an item from the list (if added by mistake), click the  button in the same row.

7. Once all items and details are complete, click **Submit** to proceed with stock-in.

SKU	Product Desc.	Color	Variation	Add Stock / Qty	Unit Cost
MF5MA100200M	Men FlexMove Scrub Suits Mand...	Arctic White	Medium		
MF5MA100200L	Men FlexMove Scrub Suits Mand...	Arctic White	Large		
MF5SC10030XS	Men FlexMove Scrub Suits Straig...	Blush Peach	Extra Small		

Note: All items received through Manual Purchase will automatically be stocked in the default location **"Q001."**

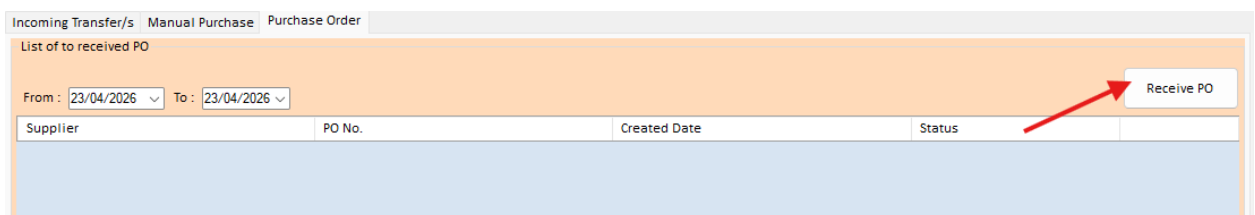

E. Receiving Purchase Order (Stock IN)

This module is used for receiving items from **open Purchase Orders (PO)** that have been created and approved in the system.

It allows users to record and received incoming stocks based on the PO details and update inventory accordingly.

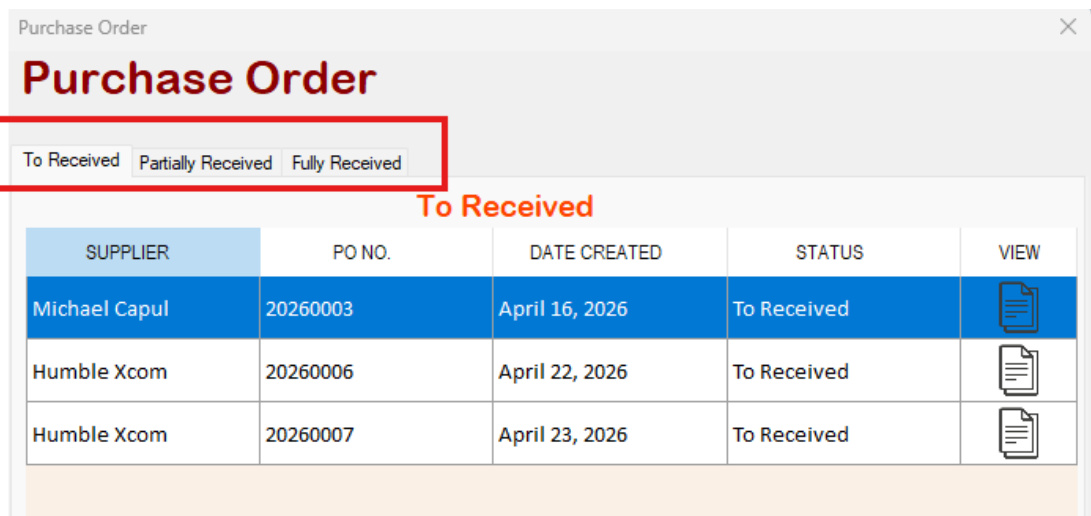

How to Receive a Purchase Order (PO)

To receive items from a Purchase Order, follow these steps:

1. Click the **Receive PO** button.
2. A pop-up window will appear displaying different status tabs.

PO Status Tabs

SUPPLIER	PO NO.	DATE CREATED	STATUS	VIEW
Michael Capul	20260003	April 16, 2026	To Received	
Humble Xcom	20260006	April 22, 2026	To Received	
Humble Xcom	20260007	April 23, 2026	To Received	

- **To Receive**
Displays the list of all receivable (open) Purchase Orders.
- **Partially Received**
Shows Purchase Orders with incomplete deliveries. Users can continue receiving the remaining items to complete the PO.
- **Fully Received**
Displays Purchase Orders that have been completely received.

Receiving Process

- Go to the **To Receive** tab to process new Purchase Orders.
 - If continuing an incomplete transaction, go to the **Partially Received** tab instead.

Purchase Order

2	MF5SC10030XL	Men FlexMove Scrub Suits Straight Cut Style 1 SC	Blush Peach	XL	100	0.00		

RECEIVED PO

- Review the entered details.
- Click the **Received PO** button to confirm.

Partial and Fully Received

- In the **Partially Received** tab, users can receive items multiple times until all quantities are fully completed.

Partial Receiving Process

- Go to the **Partially Received** tab.
- Select the Purchase Order (PO) want to receive again.
- Follow the same receiving process.
- Enter the remaining quantity for each item in the corresponding row.
- Click the **Receive / Submit** button to confirm.
- Once all items are completely received, the Purchase Order will automatically move to the **Fully Received** status.

View Receiving History

This feature allows users to view the history of all received items, whether from **Partially Received** or **Fully Received** Purchase Orders.

To view the receiving history:

1. Click the **View History** button below.
2. **Select Delivery Receipt.**
3. The system will display all recorded receiving transactions.

The screenshot displays the 'Purchase Order' management interface. At the top, it shows the 'Supplier' as 'Michael Capul' and the 'PO No.' as '20260001'. Below this, there's a 'Select Delivery Receipt' dropdown menu. A red box highlights this dropdown, which is open, showing a list of delivery dates and references: 'April 23, 2026 (234)', 'April 16, 2026 1', and 'April 23, 2026 234'. The main table below lists items received, with columns for SKU, GENDER, TYPE, CATEGORY, COLOR, VARIATION, QTY DELIVERED, No. of print, Printed, and Select print. The first row shows 'MFSJO10020XS' for 'Men' in the 'Jogger Style 1 JO' category, with 'Arctic White' color and 'Extra Small' variation, with a quantity of 1 delivered and 1 printed. A 'PRINT QR' button is visible in the top right corner. At the bottom left, there is a '<< Back to Receiving' button.

SKU	GENDER	TYPE	CATEGORY	COLOR	VARIATION	QTY DELIVERED	No. of print	Printed	Select print
MFSJO10020XS	Men	Suits	Jogger Style 1 JO	Arctic White	Extra Small	1	1	0	☐

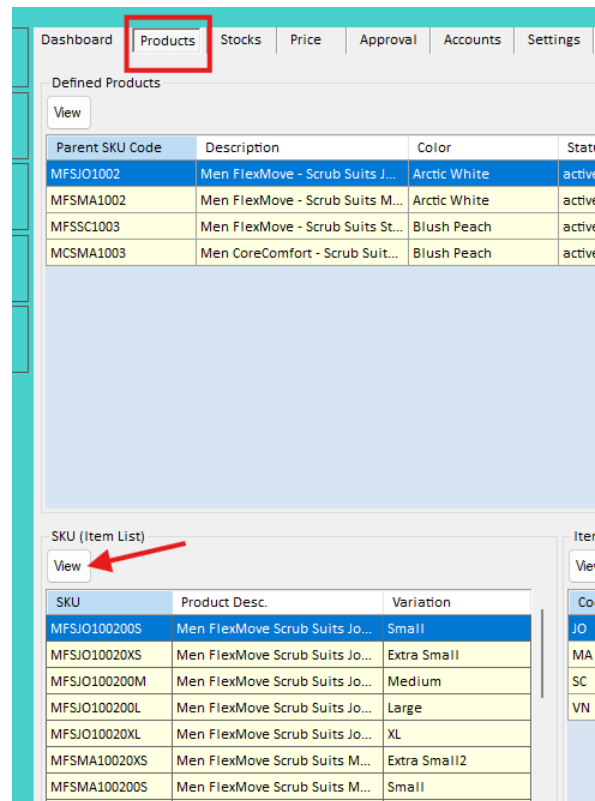

4. Users can review details such as items received, quantities, and receiving dates.

III. Printing SKU Sticker

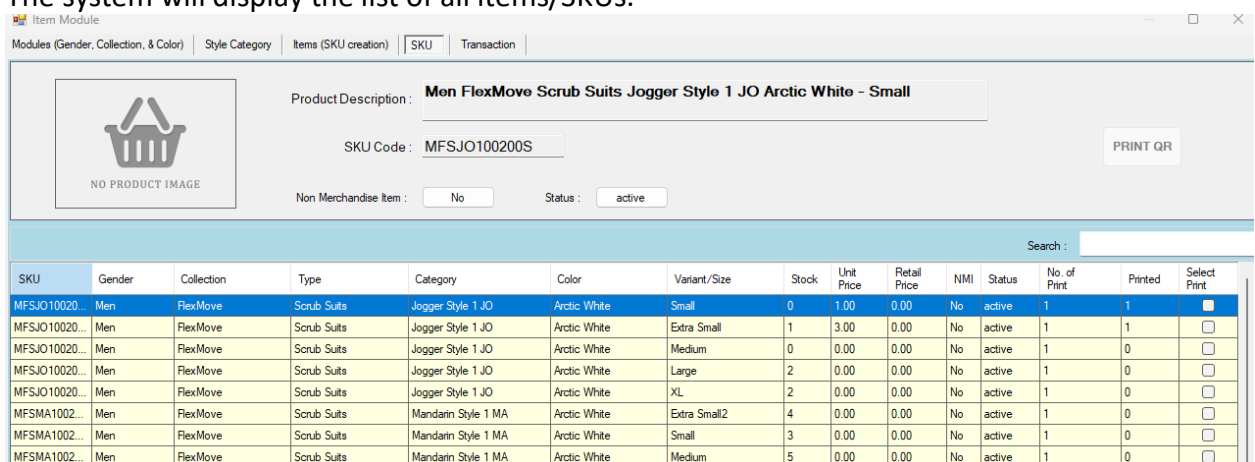

This feature allows users to print QR stickers for selected SKUs from the product list.

How to Print SKU QR Sticker via Product Tab Module > SKU.

1. Go to the **Product Tab Module**.
2. Click the **View** button under **SKU (Item List)**.

3. The system will display the list of all items/SKUs.

4. Select the items you want to print by ticking the **checkbox** in each row.
5. In the **No. of Print** column, enter the number of copies for each SKU QR sticker.

6. Once selection and quantity are set, click the **Print QR** button.

The screenshot shows the 'Item Module' window. At the top, there are tabs for 'Modules (Gender, Collection, & Color)', 'Style Category', 'Items (SKU creation)', 'SKU', and 'Transaction'. The 'Items (SKU creation)' tab is active. Below the tabs, there is a 'Product Description' field with the text 'Men FlexMove Scrub Suits Jogger Style 1 JO Arctic White - Medium'. Below this is a 'SKU Code' field with the value 'MFSJO100200M'. To the right of the SKU code is a 'PRINT QR' button, which is highlighted with a red arrow. Below the product information, there is a table with columns: SKU, Gender, Collection, Type, Category, Color, Variant/Size, Stock, Unit Price, Retail Price, NMI, Status, No. of Print, Printed, and Select Print. The table contains several rows of data. The first three rows are highlighted with a red box, and the 'Select Print' column for these rows has checkboxes that are checked. A red arrow points to the 'PRINT QR' button.

SKU	Gender	Collection	Type	Category	Color	Variant/Size	Stock	Unit Price	Retail Price	NMI	Status	No. of Print	Printed	Select Print
MFSJO10020...	Men	FlexMove	Scrub Suits	Jogger Style 1 JO	Arctic White	Small	0	1.00	0.00	No	active	1	0	☒
MFSJO10020...	Men	FlexMove	Scrub Suits	Jogger Style 1 JO	Arctic White	Extra Small	1	3.00	0.00	No	active	3	0	☒
MFSJO10020...	Men	FlexMove	Scrub Suits	Jogger Style 1 JO	Arctic White	Medium	0	0.00	0.00	No	active	1	0	☒
MFSJO10020...	Men	FlexMove	Scrub Suits	Jogger Style 1 JO	Arctic White	Large	2	0.00	0.00	No	active	1	0	☐
MFSJO10020...	Men	FlexMove	Scrub Suits	Jogger Style 1 JO	Arctic White	XL	2	0.00	0.00	No	active	1	0	☐
MFSMA1002...	Men	FlexMove	Scrub Suits	Mandarin Style 1 MA	Arctic White	Extra Small2	4	0.00	0.00	No	active	1	0	☐
MFSMA1002...	Men	FlexMove	Scrub Suits	Mandarin Style 1 MA	Arctic White	Small	3	0.00	0.00	No	active	1	0	☐
MFSMA1002...	Men	FlexMove	Scrub Suits	Mandarin Style 1 MA	Arctic White	Medium	5	0.00	0.00	No	active	1	0	☐
MFSMA1002...	Men	FlexMove	Scrub Suits	Mandarin Style 1 MA	Arctic White	Large	5	0.00	0.00	No	active	1	0	☐
MFSSC10030...	Men	FlexMove	Scrub Suits	Straight Cut Style 1 SC	Blush Peach	Extra Small	5	0.00	0.00	No	active	1	0	☐
MFSSC10030...	Men	FlexMove	Scrub Suits	Straight Cut Style 1 SC	Blush Peach	Small	5	0.00	0.00	No	active	1	0	☐

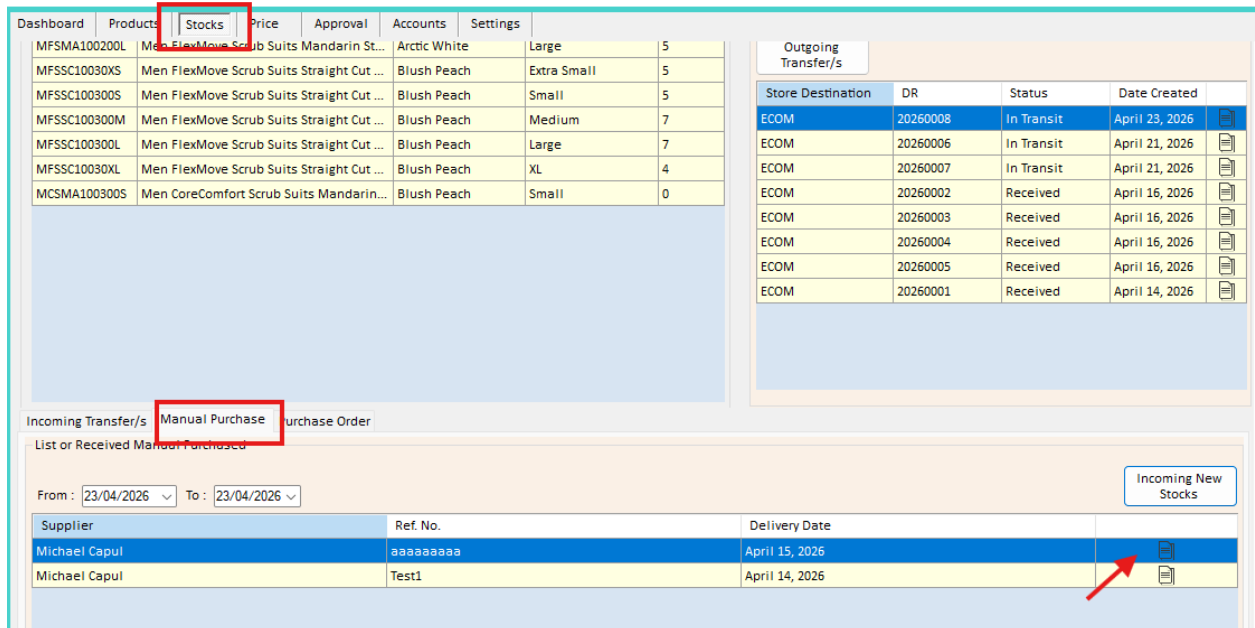

The system will then generate and print the QR stickers based on the selected SKUs and specified number of copies.

Printing QR via Stock Module (Manual Purchase)

To print QR stickers from Manual Purchase records, follow these steps:

1. Go to the **Stocks Tab Module**.
2. Under the stock Data Grid, select the **Manual Purchase** tab.
3. The system will display the history of manual purchase transactions.

- Click the  button in the row of the selected transaction to view the item list.

PRINT QR

Printing QR via Stock Module (Purchase Order Receiving)

To print QR stickers from Purchase Order receiving records, follow these steps:

- Go to the **Stock Tab Module**.

2. select the **Purchase Order** tab.
3. Click the **Receive PO** button. A new form window will pop up.

The screenshot shows a web application interface with a top navigation bar containing 'Incoming Transfer/s', 'Manual Purchase', and 'Purchase Order'. The 'Purchase Order' tab is selected and highlighted with a red box. Below the navigation bar, there is a section titled 'List of to received PO' with a date range filter set to 'From : 23/04/2026' and 'To : 23/04/2026'. On the right side of this section, a 'Receive PO' button is highlighted with a red box. Below the filter, there is a table with the following data:

Supplier	PO No.	Created Date	Status	
Michael Capul	20260003	April 16, 2026	To Received	
Humble Xcom	20260006	April 22, 2026	To Received	
Humble Xcom	20260007	April 23, 2026	To Received	

Accessing Receiving History

The screenshot shows a 'Purchase Order' window with a title bar and a close button. The main heading is 'Purchase Order'. Below it, there are three tabs: 'To Received', 'Partially Received', and 'Fully Received'. The 'Fully Received' tab is selected and highlighted with a red box. Below the tabs, the text 'Fully Received' is displayed in orange. Underneath, there is a table with the following data:

SUPPLIER	PO NO.	DATE CREATED	STATUS	VIEW
Michael Capul	20260001	April 14, 2026	Received	
Michael Capul	20260002	April 15, 2026	Received	

4. In the PO Receiving window, go to either:
 - o **Partially Received** tab, or
 - o **Fully Received** tab
 depending on the PO status.
5. Select the Purchase Order by clicking the corresponding button in the row.
6. Click the button below to view the receiving history details.

To view receiving history of this PO, click [here](#).

7. **Select Delivery Receipt.**

Printing QR

7. In the receiving history list, locate the **No. of Print** column.
8. Enter the number of copies to print for each item.
9. Input number of print then tick the **checkbox** in the same row of the item you want to print.
10. Click the **Print QR** button to generate and print the QR stickers.

This will print QR stickers based on the selected receiving records and specified quantity.

IV. Printer Setup: Xprinter XP-470B

The **Xprinter XP-470B** is used for printing SKU QR code stickers. Follow the steps below to properly configure the printer.

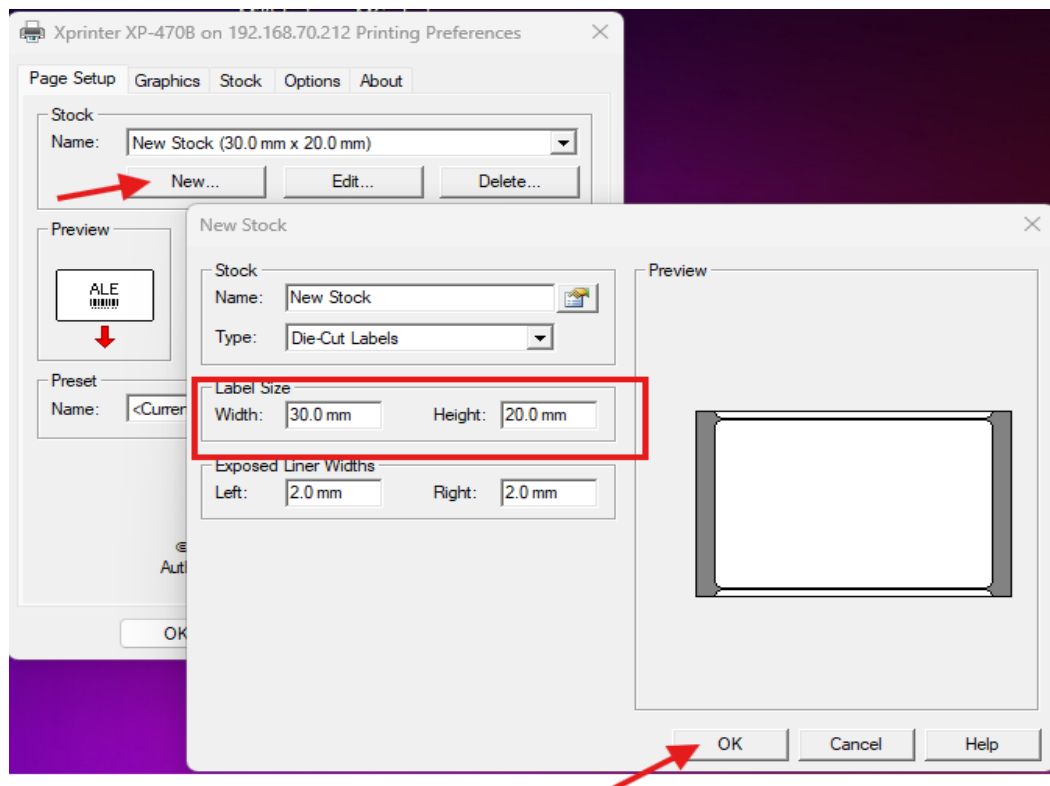

Set as Default Printer

1. On the Windows search bar, type **"Printers & Scanners."**
2. Open the **Printers & Scanners** settings.
3. Select **Xprinter XP-470B** from the list of printers.
4. Click **Set as Default**.

Configure Sticker Size

1. Go to **Printing Preferences** of the Xprinter XP-470B.
2. Navigate to the **Page Setup** tab.

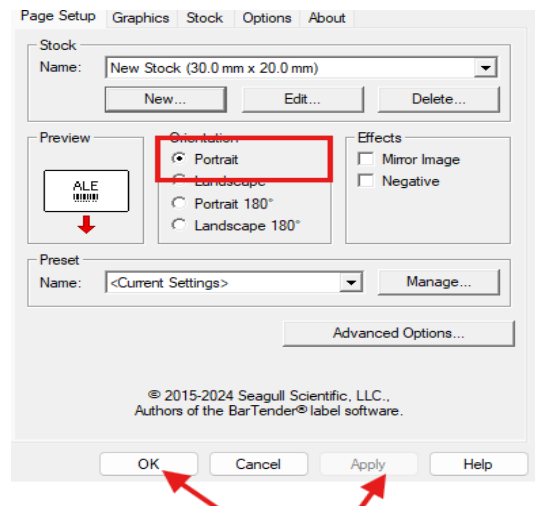

- Under **Stock**, click **New** to create a custom size.

- Set the following dimensions:
 - Width: 30 mm
 - Height: 20 mm
- Save the new stock size.

Set Orientation

- In the same settings window, locate **Orientation**.

- Select **Portrait**.

3. Click **Apply**, then **OK**.

Note: Ensure the sticker size matches your actual label roll to avoid misalignment when printing.

V. Price Module

The **Price Module** allows users to view and manage product pricing within the system.

In this module, users can:

- View the **Unit Price** (cost or base price of the item)
- View the **Retail Price** (selling price of the item)
- Manually update product prices when necessary

This module ensures that all product pricing is accurate and up to date for inventory and sales operations.

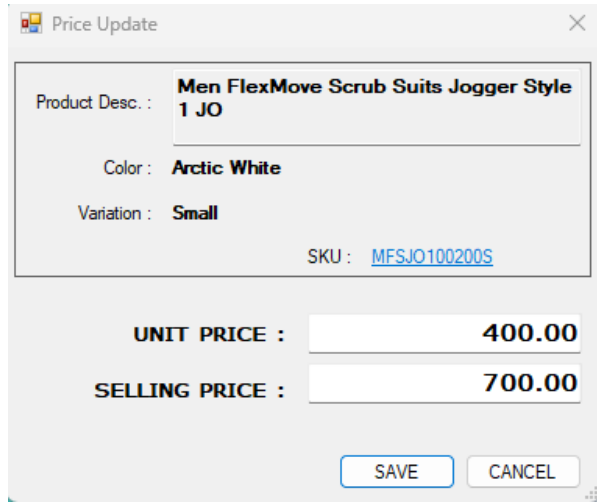

How to Update Product Price

1. Go to the **Price Tab Module**.

Dashboard	Products	Stocks	Price	Approval	Accounts	Settings
Find :						
SKU	Product Desc.	Color	Variation	Unit Price	Retail Price	
MFSJO100200S	Men FlexMove Scrub Suits Jog...	Arctic White	Small	1.00	0.00

5. Save or confirm the changes.

Note

- Always double-check the correct **item or SKU** before updating prices to avoid errors.
- Ensure that the updated prices are accurate, as they may affect inventory valuation and sales transactions.

VI. User Authority

The system uses authority codes to define user roles and access permissions.

Authority Codes

Code	Description
STK	Stock Clerk
RPT	Report
ADM	Administrator
OPE	Operator – System Maintenance
CAS	Cashier

Module Access

User access to system modules is based on assigned authority codes:

- **STK (Stock Clerk) and ADM (Administrator)**
 - Can access and manage the following modules:
 - Product Module
 - Stock Module
 - Price Module
- **RPT (Report) and ADM (Administrator)**
 - **Approval Tab** - Can approve transactions in the **Store-to-Store Transfer Module**

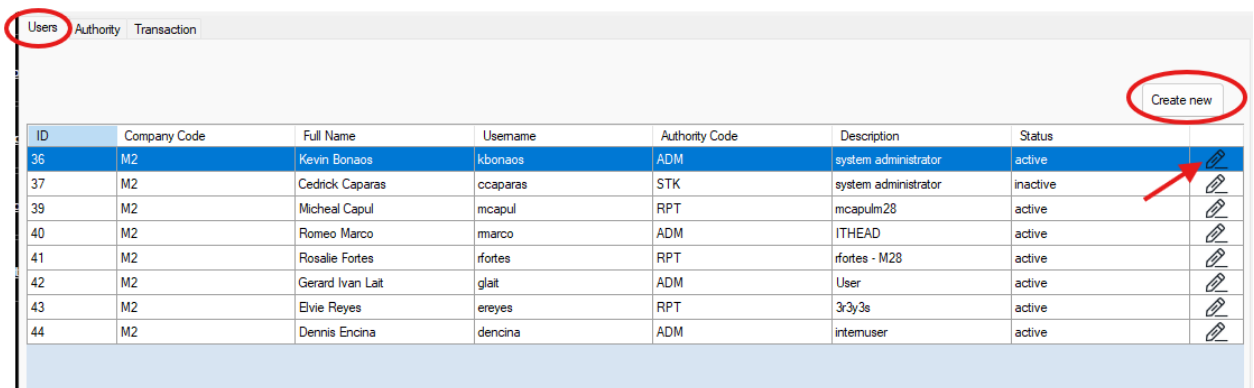

Administrator (ADM) Access and Responsibilities

The **Administrator (ADM)** has full system access and is responsible for managing system configurations, users, and key processes.

Administrative Functions

The Administrator can perform the following:

- **RPT and STK Modules** – Full access to the system.
- **User Management** – Create, update, and manage user accounts and authority levels.

Users Authority Transaction							
ID	Company Code	Full Name	Username	Authority Code	Description	Status	
36	M2	Kevin Bonaos	kbonaos	ADM	system administrator	active	
37	M2	Cedrick Caparas	ccaparas	STK	system administrator	inactive	
39	M2	Michael Capul	mcapul	RPT	mcapulm28	active	
40	M2	Romeo Marco	marco	ADM	ITHEAD	active	
41	M2	Rosalie Fortes	rfortes	RPT	rfortes - M28	active	
42	M2	Gerard Ivan Lait	glait	ADM	User	active	
43	M2	Elvie Reyes	ereyes	RPT	3r3y3s	active	
44	M2	Dennis Encina	dencina	ADM	intemuser	active	

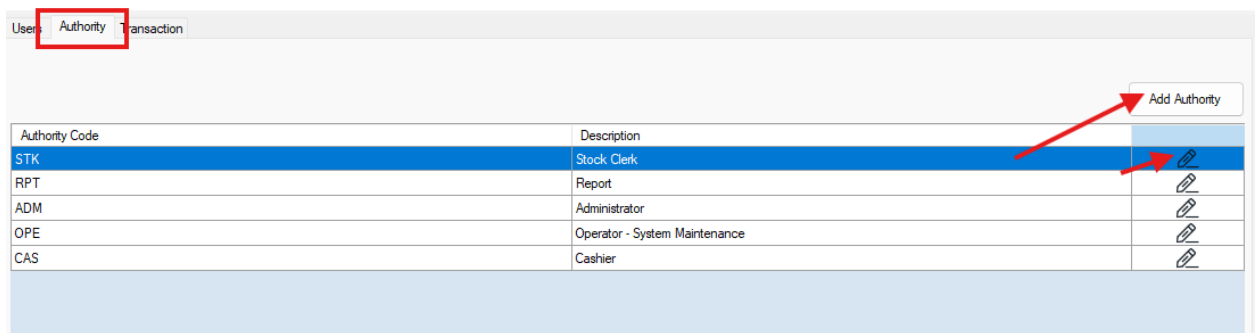

How to Create a New User

1. Go to the **Accounts Tab**.
2. Under **Users**, click the **View** button.
3. Click the **Create New User** button.
4. Fill in the required user details (e.g., name, username, password, and authority level).
5. Click **Submit** to create the user account.

How to Update an Existing User

1. Go to the **Accounts Tab**.
2. Under **Users**, click the **View** button.
3. Locate the user you want to update.
4. Click the **Update/Edit** button in the same row.
5. Modify the necessary user details or authority level.
6. Click **Submit** to apply the changes.

- **Authority Management** – Assign and modify user roles and permissions.

User Authority Transaction		
		Add Authority
Authority Code	Description

How to Create Authority

1. Go to the **Accounts Tab**.
2. Under **Authority**, click the **View** button.
3. Click the **Add Authority** button.
4. Enter the required details:
 - **Authority Code**
 - **Description**
5. Click **Submit** to create the new authority.

How to Update Authority

1. Go to the **Accounts Tab**.
2. Under **Authority**, click the **View** button.
3. Locate the authority you want to update.
4. Click the **Update/Edit** button in the same row.
5. Modify the **authority description** or other details as needed.

6. Click **Submit** to apply the changes.

- **Store Management** – Add or update store/warehouse details (*in database and not yet in the system*).
- **Database Configuration** – Update and maintain database connection settings.

- **System Events Triggering** – Allows the Administrator to manually trigger system processes to update data in the SKU List, Item Price, and Item Balance modules.

The screenshot shows the 'Settings' tab in a web application. The 'Local Server' section on the left contains fields for Server IP, Username, Password, and Database (Audit, Inventory, Sales), with 'Test' and 'Apply' buttons. The 'Central Server' section below it has similar fields, with some values redacted. The 'Company' table on the right lists three companies. The 'Store' dropdown is set to 'MAIN'. The 'Event for Products' section at the bottom right contains three buttons: 'Item SKU', 'Item Price', and 'Item Balance', which are highlighted with a red box and arrows. The 'Settings' tab in the top navigation bar is also circled in red.
